CAREER OBJECTIVE

Motivated and detail-oriented Computer Science Engineering student with hands-on experience in Python, C, Data Structures, and Artificial Intelligence. Certified by Microsoft, EY, and Maiyyam. Eager to contribute innovative solutions and grow within a dynamic MNC environment, leveraging strong technical foundations and a problem-solving mindset.

EDUCATION

B.E. Computer Science & Engineering

2025 – 2029 (Expected)

Easwari Engineering College, Chennai (Affiliated to Anna University)

TECHNICAL SKILLS

Languages	Python, C, HTML
CS Concepts	Data Structures & Algorithms, Object-Oriented Programming, Artificial Intelligence
Tools & OS	Git, GitHub, VS Code, Linux / Ubuntu, Bash Scripting
Libraries	NumPy, Pandas, Matplotlib, Scikit-learn (fundamental level)
Platforms	LeetCode · GitHub · LinkedIn

CERTIFICATIONS & TRAINING

★ **AI Skills Passport**

Microsoft & EY

Industry-grade AI skills program covering ML, ethics, and deployment

★ **Artificial Intelligence Traineeship**

Maiyyam

Comprehensive AI foundations and applied learning modules

★ **Data Structures Using C**

CodeTantra

Arrays, linked lists, stacks, queues, trees, graphs, sorting & searching

★ **Introduction to Modern AI**

Cisco NetAcad

Completed via Cisco Networking Academy — offered by Easwari Engineering College (Autonomous)

★ **HTML Essentials**

Cisco NetAcad

Web development fundamentals covering HTML structure, elements, and best practices

★ **Security and Connectivity Support**

Cisco NetAcad

Network security and connectivity concepts via Cisco Networking Academy

★ **1M1B Green Skills Academy**

1M1B / AICTE

Activation Workshop on green skills & technology-driven sustainability solutions — in partnership with AICTE, supported by Salesforce

PROJECTS

WasteWise AI – Smart Waste Management Web App *2025*

i2I 3.0 Challenge · Wipro Foundation / IIT Madras

- Built an interactive web artifact for AI-powered waste classification and smart collection route suggestions using Claude AI (Anthropic).
- Implemented a gamified community rewards system to encourage responsible waste segregation.
- Participated in i2I 3.0 Challenge — demonstrated practical AI prompt engineering and rapid prototyping skills.

FuelDrop – On-Demand Fuel Delivery App *2025*

Personal Project

- Designed and built a fully interactive web artifact simulating an on-demand fuel delivery platform using Claude AI (Anthropic).
- Created end-to-end UI flows covering user booking, live tracking, and payment screens.
- Demonstrated ability to leverage AI tools to rapidly prototype real-world application concepts.

ACHIEVEMENTS & ACTIVITIES

- Participated in National Level Protothon (Phase-I) at SIMATS Engineering — presented CloudGuard, an IoT-based disaster alert platform.
- Participated in i2I 3.0 Challenge by Wipro Foundation & IIT Madras — submitted WasteWise AI, a smart waste management platform.
- Active LeetCode practitioner — solved problems in array manipulation, string processing, linked lists & more using Python.
- Completed Linux fundamentals training covering file management, WSL/Ubuntu setup, and shell scripting.
- Completed Python programming course covering OOP, file I/O, data science libraries, and modular coding.

CORE COMPETENCIES

Team Collaboration	Problem Solving	Analytical Thinking	Quick Learner
Attention to Detail	Creative Thinking	Communication	Adaptability
